**Description** EN54-24 6W “Sunflower” elliptical sound projector for voice alarm systems

The C56/6-EN elliptical sound projector is made of self-extinguishing white ABS, it has a high acoustic efficiency and an original and modern design. This projector is equipped with a transformer for constant-voltage lines and with a swivelling bracket for securing it easily to a wall or the ceiling; the protection degree is IP44, for indoor use (shops, boutiques, offices). This speaker unit has been developed specifically for use in emergency and evacuation systems (VES) and has its own ceramic terminal strip and thermal fuse. These ensure the protection of the line connecting the loudspeakers if a fire puts one or more of the speaker units connected to it out of use.
